

SKILLS

- ❖ Programming Languages: **C++**
- ❖ Problem Solving: **Data structures and algorithms**
- ❖ Web Dev & Framework: **Next.js, React.js, HTML, CSS, JavaScript**
- ❖ Server-Side Technologies: **Node.js, Express.js, Rest API, Scrapy, BeautifulSoup**
- ❖ Databases: **MongoDB, MySQL**
- ❖ Version Control & DevOps& Others: **Git, GitHub, Docker, Vscode**

EDUCATION

- ❖ B.tech in Computer Science and Engineering | JECRC UNIVERSITY, Jaipur **CGPA: 9.10 | (2025)**
- ❖ XII (RBSE) | New Adarsh School ,Sabla **Per: 99.40 | (2021)**
- ❖ X (RBSE) | Jain School , Sabla **Per: 92.17 | (2019)**

ACHIVEMENTS

- ❖ **Rated 5*** on [Hacker Rank](#) , A competitive programming platform **C++**
- ❖ **Rated 2*** on [Code Chef](#) , A competitive programming platform **C++**
- ❖ Above **100 days** of POTD solving streak on [leetcode](#) **C++**
- ❖ Ranked under **top 5** in prelim of SIH(Smart India Hackathon'23) **[[project_link](#)]**

ACADEMIC PROJECTS

- ❖ **CrawlNCompare:** - [[server link](#)] [[client link](#)] **(Next.js, Scrapy, BeautifulSoup, Python, JS)**
A web application aimed at simplifying the online shopping experience by aggregating products from various e-commerce platforms like Amazon and Flipkart onto one user-friendly interface. Powered by web scraping technology
- ❖ **Financial_Fraud_Detection** - [[link to page](#)] **(Streamlit,HTML,CSS,JS,ML)**
Collaborated with a team at the Rajasthan IT Hackathon to develop machine learning algorithms for analyzing user input data and financial information. The system detects fraudulent activities and integrates the model into a user-friendly interface, providing real-time alerts.
- ❖ **AnimeQuotes** - [[link to page](#)] **(REST API, HTML, CSS , JS)**
AnimeQuotes is a React project created for anime fans. This project utilizes the AnimeChan API to fetch and display anime quotes. It provides users with a collection of memorable quotes from various anime series.
- ❖ **Skybridge: Elevate Your Online Meetings** - [[repository link](#)] **(MERN and TypeScript)**
Skybridge is a webRTC powered Video Conferencing Web app where you can schedule your meetings and can do the meeting with the integration of zego cloud API using react.js
- ❖ **Student ERP** - [[repository link](#)] **(MySQL and other web techs)**
A web-based application designed to manage student data for a school or educational institution. The project uses MySQL as the database management system and Node.js as the server-side scripting language
- ❖ **Stock Management System** - [[repository link](#)] **(Next.js,MongoDB Atlas, JS)**
To efficiently manage inventory records and provide a user-friendly interface an inventory management system that utilizes MongoDB Atlas as the database and Next.js for the frontend development

POSITION OF RESPONSIBILITY

- ❖ Former Core Design Team member | Coding Ninjas, JECRC **(2021- 2022)**
- ❖ Former Member | JU Makerspace , JECRC **(2021- 2022)**
